### Forecast for Wednesday 08 Feb 2023

**Weather:** High cloud across much of the area through the early hours, with low cloud developing during the morning. Further low cloud pushing in from the northwest by around mid-afternoon, with rain following behind. This turning to snow above 400-600m by late afternoon/evening. Very strong winds through the majority of the day. The front clears later in the evening to leave clear spells and scattered blustery showers behind, falling as snow above 200-400m.

**Chance of cloud-free hill tops above 800m:** 80% at first, decreasing to 60% through the morning, 10% by mid-late afternoon. Increasing to 60% in the evening.

**Low cloud and visibility:** Good visibility to start but scattered low cloud with bases around 500-700m developing through the morning. Extensive low cloud across the area, leading to hill fog, arriving from the northwest by late afternoon, with moderate or poor visibility in rain or snow, potential for whiteout conditions in blizzards. Band of low cloud clearing later in the evening with scattered low cloud in association with showers later, visibility generally good but poor in snow showers.
