

This is a detailed meteorological map of the North Atlantic and Arctic regions. The map features a grid of latitude and longitude lines. Landmasses, including Greenland, Iceland, and parts of North America and Europe, are shown in green. The ocean areas are white. The map displays various weather data points, including isobars (lines of equal pressure) and isotherms (lines of equal temperature). Numerous numerical values are plotted across the map, representing specific weather conditions and data points. The map is oriented with North at the top.
