

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Saturday 09 Jan 2016

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
There will be further outbreaks of showery rain and hill snow across Scotland with severe gales in the northwest. Elsewhere across the UK there will be a mix of sunshine and blustery showers, these heavy and occasionally thundery, particularly around southern and western coasts. The driest and brightest weather is likely across central and south-eastern areas.

Outlook for Monday and Tuesday:
Unsettled across the UK as we move into the new working week with showers or longer spells of rain. Snow is likely over northern hills, maybe to lower levels at times. Turning colder with frosts, and feeling colder still with strong winds for some.
