

The map displays the North Atlantic region, including parts of North America, Europe, and the surrounding oceans. A grid of yellow squares represents the 1000 hPa wind vectors, showing a general flow from the southwest towards the northeast. Red dots represent the 1000 hPa geopotential height contours, with values ranging from 0 to 2000 m. A color scale for the contours is provided in the bottom right corner, with a gradient from light yellow (0 m) to dark grey (2000 m). The map also includes latitude and longitude lines, and a scale bar indicating distances in kilometers (0, 1000, 2000 km).
