

## National Severe Weather Warning Service

### Chief Forecasters Assessment

Skies will brighten following a band of showery rain, though rising temperatures will cause heavy showers to develop. Whilst many will miss the worst, some places could see 20-30 mm in an hour or less. The risk of this looks slightly higher across Scotland than across England or Northern Ireland.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **13:00 on Sat, 27th May 2017** until **23:00 on Sat, 27th May 2017**

Heavy, thundery showers on Saturday afternoon and evening have the potential to bring localised flooding, hail and frequent lightning.
