

## National Severe Weather Warning Service

### Chief Forecasters Assessment

Areas of rain will move north across parts of southern, central and eastern England during the first part of Tuesday morning, with some thundery downpours possible. 20-30 mm of rain, and possibly very locally 40 mm, could fall in 3-4 hours.

From late Tuesday morning showers are then expected to develop across parts of the east and southeast of England. Whilst many will miss the worst of the rain, the heaviest showers could bring 25 mm in an hour to some spots with 40-50 mm in 2-3 hours possible.

The warning has been adjusted to bring forward the start time and to extend the area further west and north to cater for the heavy rain during Tuesday morning.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **03:00 on Tue, 08th Aug 2017** until **21:00 on Tue, 08th Aug 2017**

An area of rain with possible thundery downpours is expected to develop along a zone from central southern England through the South and East Midlands to Lincolnshire and possibly affecting some northern and western parts of East Anglia during Tuesday morning.

Heavy showers will then develop during Tuesday. Where these occur they are likely to be slow moving and perhaps thundery. Some areas may miss the showers entirely whilst others could see 2 to 3 hours of heavy rain.

Where this occurs some disruption is possible such as localised flooding of roads.
