

National Severe Weather Warning Service

Chief Forecasters Assessment

As a weather system moves in from the south and comes up against cold air over the UK, rain will turn to heavy snow in places. Several cm of snow are possible, mainly over ground above around 200 m, with drifting in strong winds. The greatest risk of medium impacts is across the northern Pennines and Scottish Borders where there is a chance of around 10 cm of snow accumulating. There is also the possibility of a few cm of wet snow gathering locally at lower levels.

The snow is likely to be affecting southern parts of the warning area in the early hours of Monday before reaching Scotland later in the morning. Snow is likely to gradually turn to rain across the southern Pennines later on Monday.

At present there is still some uncertainty in exact snow amounts, and how quickly snow will turn back to rain again in the south of the warning area.

This warning has been updated to be extended across more of Scotland, and removed from Wales.

The Met Office have issued a **Yellow Warning of Snow**

Valid from **03:00 on Mon, 02nd Apr 2018** until **23:45 on Mon, 02nd Apr 2018**

Headline: Heavy snow is expected over parts of England and Scotland, especially for high ground.

What To Expect: There is a chance of travel delays on roads with some stranded vehicles and passengers, along with delayed or cancelled rail and air travel.

There is a small chance that some rural communities could become cut off, mainly across the northern Pennines and Scottish Borders.

There is a chance that power cuts will occur and other services, such as mobile phone coverage, may be affected.
