Nothing further to add.

Forecast for Thursday 08 Feb 2024

**Weather:** Dry with clear spells and a frost overnight, some mist or freezing fog possible in the valleys. Cloud thickening and lowering during the morning, some patchy light snow by midday. The snow becoming more persistent through the afternoon and evening, mainly across the Eastern and Far Eastern Fells. Summit gales developing with severe wind chill, temporary blizzard and whiteout conditions possible at height.

**Maximum wind:** Increasing East 30 to 35mph gusts 50mph during the afternoon and evening.

**Chance of cloud-free hill tops above 800m:** 80% falling to 40%, the lowest cloud expected over the Eastern and Far Eastern Fells.

**Low cloud and visibility:** Cloud becoming extensive, base 600 to 900m, during daylight hours, patches or occasional to 300m across the Eastern and Far Eastern Fells during the afternoon and evening. Visibility starting very good, but becoming moderate to very poor at height.

**Temperature:**   **Valleys:** Zero to Minus 3 Celsius  
                          **At 800m:** Minus 2 to Minus 5 Celsius  
                          **Freezing level:** All levels

## Ground Conditions Supplement

Date: Tuesday 6 February Location: Blencathra summit at 11:00 Full report: The vast majority of the Lakeland fells are now free of snow and ice with only one small patch observed on Blencathra today. Swirral and Striding Edges can now both be climbed and descended without setting foot on snow. Elsewhere the few remaining patches of snow and cornices are to be found above 900m on steep north through east aspects and are unlikely to create a hazard for walkers. Despite the lack of snow full winter clothing is still required to enjoy the fells in comfort and safety. The very minimum should include a waterproof top & bottoms, warm layers, hats and gloves, a map & compass, headtorch and boots with plenty of grip. The weather is forecast to turn more wintry throughout the week with the potential for snow to fall to low levels. Goggles and microspikes will be very useful additions to your kit. Temperature: minus 0.1 C, Maximum wind speed 28.3 mph, Wind chill: minus 8.5 C, Average wind speed: 12.9 mph
