

This is a detailed meteorological map of the North Atlantic region, showing pressure systems, isobars, and weather fronts. The map includes the British Isles, Scandinavia, and parts of North America and Europe. Key features include a low-pressure system over the North Atlantic with a cold front extending south and a warm front extending east. High-pressure systems are located over the British Isles and Scandinavia. The map uses various colors (green, yellow, red) to indicate different weather conditions and includes numerous numerical values for pressure and temperature.
