

[illegible]

This polar projection map of the Northern Hemisphere illustrates a complex weather system. The map features a grid of latitude and longitude lines. Numerous low (L) and high (H) pressure centers are marked with their respective values. Isobars are drawn in green and pink, showing pressure gradients. Wind vectors are represented by blue and red arrows, indicating wind direction and speed. Various weather symbols, including clouds, rain, and snow, are scattered across the map. The map also shows the outlines of the continents and the Arctic region.
