Forecast for Sunday 03 Sep 2023

Weather: Cloudy with rain and drizzle becoming persistent and heavy at times but mainly dry over eastern ranges overnight. The day will stay cloudy with rain and drizzle becoming patchy later in the morning. Eastern ranges however remain mostly dry in the morning with patchy rain and drizzle spreading east through the afternoon.

Chance of cloud-free hill tops above 800m: 20%

Low cloud and visibility: Extensive cloud cover 500-600m in the west becomes broken, rising to 700-800m, in the east with the visibility poor in rain and drizzle.

Met Office Aberdeen Meteorologist's View

A drier and slightly brighter day east with rain and drizzle reducing visibility and making navigation difficult in the west. Wind will make walking conditions unpleasant, particularly on exposed ridges and summits.

Forecast for Monday 04 Sep 2023

Weather: Rain and drizzle will retreat to northwestern ranges through the morning with southern and eastern parts becoming mostly dry with increasing bright or sunny spells.

Maximum wind: West 40-45mph gust 55mph.

Chance of cloud-free hill tops above 800m: 30% increasing 60% by the afternoon.

Low cloud and visibility: Broken cloud 500-600m in the west with patchy cloud 800-900m east at first. Broken cloud retreats to the west coast by the afternoon as cloud becomes patchy, rising above the summits elsewhere. The visibility will be poor in rain or drizzle at first otherwise good.

Temperature: **Glens:** Plus 11 Celsius rising to Plus 20 Celsius.

At 800m: Plus 11 Celsius.

Freezing level: Above the summits.
