Meteorologist's View

Feeling bitterly cold with a severe wind chill for early April.

Forecast for Wednesday 07 Apr 2021

Weather: Clear spells overnight with a widespread frost, perhaps a few wintry showers in the west. A sunny start then turning cloudy by the afternoon. Some showers edging into the west later, wintry above 400m.

Maximum wind: West or NW 25 gusts 35mph at first, decreasing to 10-15mph.

Chance of cloud free mountain/hill tops above 800m: 80%, becoming 30% in the evening.

Visibility: Excellent for most of the time. Becoming poor at height in the evening with extensive cloud developing above 600m.

Temperature: **Valleys:** Minus 3C rising to 4C.
At 800m: Minus 6C rising to Minus 2C.
Freezing level: All levels at first, rising to 500m during the afternoon.

Ground Conditions Supplement

Date: Monday 5 April 2021 Location: Helvellyn summit at 12:30 Full report:

We have continued to provide the Fell Top Reports for people undertaking their daily exercise during the lockdown. We would like to remind everyone that Government guidance from 29th March is to minimise travel and to stay local. A dramatic change in conditions on the Lake District fells with the arrival of a polar air mass giving a bitterly cold northerly wind and freezing temperatures. Windchill on the summit of Helvellyn today, despite the sunshine, was nearly -19 degrees C. There was a scattering of new snow above 800m although this was thawing fast where exposed to the sun. Wintery conditions are forecast to last until at least next weekend so walkers need to be fully prepared with plenty of warm & waterproof layers, hat & gloves, a reliable & suitable method of navigation, plenty of food & drink and an emergency kit including a mobile phone, survival bag and torch. If more snow does settle on the summits then carrying microspikes or crampons and an ice axe may be appropriate. All Lakeland paths are currently clear of unavoidable snow with the overwhelming majority of the fells now totally clear. The few remaining patches of any significance lie mainly above 900m on predominantly steep N and E facing aspects. The exit slopes to both Striding & Swirral Edges are now easily climbed without setting foot on snow. Following the freeze thaw action of the winter there is a lot of loose rock around especially on Swirral Edge. There has also been a landslip on the north side of Swirral which has taken part of the path with it. Please be conservative with your plans and know both your limits and also when to turn back. This is the final Fell Top Assessor report of the 2020-21 season. Please respect, protect and enjoy the Lake District this summer and we'll be back for the first snows of next winter :) Jon, Wes & Zac. Temperature: minus 5.9 C Maximum wind speed 39.2 mph, Wind chill: minus 18.8 C, Average wind speed: 24.1 mph.
