Forecast for Monday 06 Dec 2021

Weather: A band of sleet and snow extending eastwards to all ranges overnight, clearing later on Monday morning. Then drier and brighter with sunny spells although wintry showers will follow, mostly to Perthshire hills.

Chance of cloud free mountain/hill tops above 800m: Nil improving 70% from late morning.

Visibility: Extensive cloud down to about 400 to 600m at first with very poor visibility in snow. Visibility will improve good later in the morning with clouds lifting and breaking up. However there will temporary reductions to very poor visibility in southwest as snow showers pass by, bringing clouds down to 600m.

Met Office Aberdeen Meteorologist's View

Difficult walking conditions with strong winds and sub-zero temperatures making it feel bitterly cold. Snow during the morning will bring an additional hazard.

Forecast for Tuesday 07 Dec 2021

Weather: A deceptively dry, bright start to the day. Becoming cloudy during the morning then snow extending northwards across the area during the afternoon. Dangerous conditions developing across the area as the snow will become heavy, accompanied by very strong winds leading to blizzards over higher ridges and summits. Also severe wind-chill. Sleet is likely on lower ground in east of area.

Maximum wind: Light winds at first then strengthening from a southeasterly direction later in morning with gales of severe gales in afternoon. Average speeds of 20mph increasing 30 to 40mph in afternoon with gusts 60mph on the tops.

Chance of cloud free mountain/hill tops above 800m: 90% at first reducing to nil in the afternoon.

Visibility: Very good in the morning but clouds mostly above the tops. However clouds will come well down the hills early in the afternoon with very poor visibility as snow sets in. This will lead to navigational difficulties.

Temperature: **Glens:** Minus 1 Celsius rising to plus 4 Celsius.
At 800m: Minus 2 Celsius.
Freezing level: 500m.
