Forecast for Saturday 03 Dec 2022

Weather: Cloudy with some mist and fog overnight and feeling chilly with temperatures near freezing. Mist and fog slow to clear and may linger for much of the day especially in the east. Cloud lifting and breaking a little with the odd brighter spell possible, remaining cold. Further mist is likely by late afternoon and more cloud and fog patches developing in the evening.

Chance of cloud-free hill tops above 600m: 70%, falling to 30% at times across eastern areas.

Low cloud and visibility: Broken to overcast low cloud above 700m, occasionally broken cloud down to 500-600m with showers, especially across eastern areas. Generally hazy or good visibility below the cloud, perhaps becoming very hazy this evening.

Forecast for Sunday 04 Dec 2022

Weather: Remaining cloudy and feeling cold, probably a dull day. Cloud may thicken enough to give some light showers, especially across the east. These will fall as sleet or perhaps light snow above 500m. Significant wind chill at height in the fresh or strong northeasterly winds.

Maximum wind: Northeasterly 20-25mph gusts 30-35mph.

Chance of cloud-free hill tops 600m: 70%, falling to 30% at times across eastern areas.

Low cloud and visibility: Broken to overcast low cloud above 700m, occasionally broken cloud down to 500-600m with showers, especially across eastern areas. Generally hazy or good visibility below the cloud, perhaps very hazy at first.

Temperature: **Valleys:** Plus 2 rising to 6 Celsius.
At 600m: Zero Celsius
Freezing level: 600m
