

This meteorological map displays the North Atlantic region, including the British Isles, Iceland, and parts of North America and Europe. The map features a complex pattern of pressure systems, isobars, and weather fronts. A low-pressure system is centered over the North Atlantic, with a cold front extending south and a warm front extending east. A high-pressure system is located over the Azores. The map includes numerous isobars and isotherms, as well as wind vectors and cloud cover percentages. The background is color-coded to represent different weather conditions, with green indicating clear or partly cloudy skies and yellow indicating overcast conditions. The map is overlaid with a grid of latitude and longitude lines.
