**Full report:**

We are continuing to provide the Fell Top Reports for people undertaking their daily exercise during The lockdown. We would like to remind everyone that Government guidance from 29th March is to minimise travel and to stay local.

All Lakeland paths are now clear of unavoidable snow with the overwhelming majority of the fells now totally clear. The few remaining patches still to thaw lie mainly above 900m on predominantly steep N and E facing aspects. The exit slopes to both Striding & Swirral Edges are now easily climbed without setting foot on snow.

Following the freeze thaw action of the winter there is a lot of loose rock around especially on Swirral Edge. There has also been a significant landslip on the north side of Swirral which has taken part of the path with it

The forecasts for next week suggest significant snow fall settling on the fells and possibly to low levels. Walkers over the Easter weekend and beyond should be prepared for the return of winter with plenty of warm & waterproof layers, a reliable & suitable method of navigation and emergency kit including a mobile phone, survival bag and torch. Microspikes, crampons and an ice axe will all be very useful in dealing with a return to winter. Please be conservative with your plans and know both your limits and also when to turn back.
