

This topographic map of the Kosi River basin in Nepal displays elevation contours at 500m intervals, ranging from 500m to 1000m. The map includes a grid of latitude and longitude coordinates. Numerous meteorological stations are indicated by symbols (triangles, circles, and squares) and labeled with their names and elevations. The Kosi River and its tributaries are shown as a network of lines. A legend in the bottom right corner identifies the symbols used for different types of stations: 'Rain gauge', 'Wind gauge', 'Thermometer', 'Barometer', and 'Anemometer'. The map also shows the international border with India to the south and east.
