

National Severe Weather Warning Service

Chief Forecasters Assessment

After a clear start in many areas with the temperature falling below freezing through Monday evening, it will turn cloudier from the north, with the possibility of some wintry showers in places. The temperature may come back above freezing in some places for a time, but will fall below again where the cloud breaks. Therefore, ice is likely to form where untreated roads, pavements and cycle paths are left wet after snow melts during the day, or partly melted snow refreezes, and where wintry showers occur overnight.

The Met Office have issued a **Yellow Warning of Ice**

Valid from **19:00 on Mon, 19th Mar 2018** until **09:00 on Tue, 20th Mar 2018**

Ice is likely to form on some untreated roads, pavements and cycle paths.

This increases the risk of accidents, as well as injuries from slips and falls.
