

National Severe Weather Warning Service

Chief Forecasters Assessment

Thursday morning's fog, having cleared inland, will have persisted through much of the day in some coastal locations and may begin to spread inland again quite early on Thursday evening. However, across most inland areas fog patches will form more widely overnight into Friday morning. As was the case on Thursday, not everywhere in the yellow area will see fog, but where it does form it is likely to be dense. Fog will then slowly clear through the mid morning period.

The Met Office have issued a **Yellow Warning of Fog**

Valid from **01:00 on Fri, 14th Mar 2014** until **11:00 on Fri, 14th Mar 2014**

Fog is expected to become widespread and locally dense again through Thursday night and Friday morning. Visibility is likely to fall below 100 metres at times, locally less than 50 metres.

The public should be aware of the likelihood of difficult driving conditions and some travel disruption.
