

## National Severe Weather Warning Service

### Chief Forecasters Assessment

Periods of heavy rain will continue to affect many south western parts of the UK during Tuesday, bringing a risk of minor disruption due to river and surface water flooding. Total rainfall during Monday and Tuesday will exceed 60 mm in the wettest spots, mostly over higher ground, with many places seeing 20 to 30 mm.

The more persistent rain will clear to showery conditions during Tuesday afternoon, though there is uncertainty over precise timings of this clearance.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **00:05 on Tue, 22nd Oct 2013** until **15:00 on Tue, 22nd Oct 2013**

Further heavy rain will affect much of South West England and South Wales on Tuesday, clearing during the afternoon.

The public should be aware of the risk of disruption due to localised flooding.
