**Met Office Aberdeen Meteorologist's View**

West facing coastal ranges are likely to see most of the cloud and any drizzle. Gale force winds with severe gale gusts make walking difficult on exposed ridges and summits but eases steadily through the afternoon.

**Forecast for Tuesday 05 Sep 2023**

**Weather:** Cloudy with the occasional patch of drizzle in the far north and northwest in the early morning, becoming drier by mid-morning. Sunny periods in the south spread slowly north from the morning.

**Maximum wind:** West 13-18mph veering southeast from midday.

**Chance of cloud-free hill tops above 800m:** 80%

**Low cloud and visibility:** Broken cloud 500-600m in the north and west where the visibility will be mostly good, falling poor in any drizzle. South and eastern parts will see good visibility with patchy cloud 700-900m, slowly clearing through the afternoon.

**Temperature:** **Glens:** Plus 14 Celsius rising to plus 24 Celsius.  
**At 800m:** Plus 13 to 15 Celsius.  
**Freezing level:** Above the summits.
