Ser. No. 71

Inshore Waters Forecast to 12 miles offshore
for the period 0600 UTC Friday 03 February to 0600 UTC Saturday 04 February 2023

General Situation

A westerly flow covers the region, mainly fresh to strong but with gales at first in the north of Scotland. A transient ridge of high pressure continues to build through the day, easing winds and backing the flow southwesterly. Largely settled conditions with perhaps the odd shower or spot of rain in the north. Winds then start to strengthen and veer northwesterly through Saturday as frontal band of rain gradually pushes southeastwards across the United Kingdom, with showers feeding into the northwest behind.

Cape Wrath to Rattray Head including Orkney - (SWW)

24 hour forecast:

Northwesterly 5 to 7, occasionally gale 8 at first in north, backing southerly or southwesterly 4 to 6.

Rough or very rough in far north, moderate or rough at first in far east, otherwise slight or moderate.

Rain or showers.
